

Aman Jabbi

One of the most important whistleblowers of our time
talks to us from Montana, US – live-streamed
to **The Old Convent, Beeches Green, Stroud GL5 4AD**

Thursday 5 January 2023 – 8 p.m.

HIS WARNING IS:

“Your Digital ID will be your Digital Prison”

Once we accept a **DIGITAL IDENTITY:**

NOT TO BE MISSED!! >>>> During his Zoom Presentation, Aman Jabbi will talk about an **international vaccine passport**, **digital identity**, a **social credit system** & a **central bank digital control system (CBDC)** that will lock us all down for ever. He explains the Digital Prison that is your digital Identity, and how it ties in with the coming Social Credit System that will control what you can & cannot do in your daily life.

Surveillance cameras with facial recognition software have already been erected around the world. By the end of 2020, there will be 1 billion data collecting cameras worldwide, all connected to the internet & artificial intelligence (AI). **Facial Recognition** is an essential part of the control structure, as it's the “password” to your digital identity, the social credit score system, **carbon footprint tracking**, CBDCs & more.

Cameras & audio recording devices in smart phones, cars & smart appliances also collect & share data. All this data will be used to give each

person an individual score based on their behaviour, expression & interaction with the world. Ultimately, **your social credit score will dictate what you can & cannot do, what you can buy & where you can go.**

Aman says that “facial recognition has been sold as a great convenience & security feature. With facial recognition you don’t need to remember pins & passwords, & since no one has your exact face it’s supposed to keep your personal accounts more secure. But as with most other technologies sold under the guise of convenience & security, facial recognition is ultimately a tool for mass control & an essential part of your individual digital prison.

The Chinese control system is based on facial recognition in combination with a social credit system. it is a feedback system that responds based on your behaviour. **Unbeknown to most westerners, an identical system has already been set in motion behind the scenes in Western countries. They just haven’t told you yet”.**

On Thursday 5 January, Aman will tell us about Smart City infrastructure & the implications, how smart light poles have built-in charging stations for drones & are being weaponised. You’ll also hear concepts such as: **stakeholder capitalism, 4th Industrial revolution, digital real estate, the metaverse, lockdown matrix, carbon credits, social credit score, facial recognition technology, public–private partnership** – all the concepts discussed by the WEF technocrats at Davos, 22–26 May 2022.

All these factors & more are now coming together to control the global population. This digital prison, which has mostly been built, will be the final lockdown of mankind. **We must never allow this to happen.**

Aman was at the forefront of video and camera technology in Silicon Valley. He has co-founded two camera start-ups. If you have a camera in your phone, stream video or movies, he played a part in it. Aman has a BS in Electrical & Electronics Engineering and MS in Chemistry from BITS in India, an MS in Electrical Engineering from Penn State University and studied Computer Science at Stanford University. He is an avid photographer, a world traveller and a private pilot. As a lover of liberty, Aman arrived in the US in his early 20s in search of a free society and now resides in Bigfork, Montana.

Digital ID or Digital Prison - Presentation by Aman Jabbi.

Live-streamed to The Old Convent, Stroud. 8pm, 5 January 2023.

Entry: £5 cash donation >> **DON’T MISS IT!**

There will be a Q&A session after the presentation
