

# William Keyte

## 'Learning to be Free with Our Common Law Constitution'

Talk @ The Old Convent, Beeches Green, Stroud. GL5 4AD ★  
Thursday 2<sup>nd</sup> March ★ 7.00 pm ★  
£7 cash

Born and brought up in Gloucestershire, William has lived in the Stroud area for most of his life - he always regards it a pleasure to come back! He studied music and became a teacher mainly in the Independent System. Subsequently, he then went into the IT software industry bringing his two interests of coding and education together.

He became aware in around 2005 that our reality is not necessarily quite as we were all taught in schools and universities, and this propelled him into investigating recent geo-political history and concealed parallel control structures of governance. This led him to his current area of focus of Constitutional Law around six or seven years ago.

He joined the British Constitution Group around 2015 and became active in 2017 studying matters to do with individual

rights and Natural Law. He joined the campaigning group of the Hardwick Alliance for real Ecology around 2021:

<https://hardwickalliance.org/>

William's talk 'Learning to be Free with Our Common Law Constitution', will dig a little deeper into the subject of Common Law Trial by Jury, Natural Law, Esoteric knowledge and Consciousness.

**So come  
along and  
join us and  
William,  
Thursday  
2<sup>nd</sup> March,  
7pm and  
BRING A  
FRIEND!**

## *Universal Declaration for the Future of Humanity*

*Empowering the sovereign peoples of the world to stop global totalitarianism, corporate-driven ecocide and unlawful debt-slavery by simply implementing solutions that embrace truth, freedom, justice and prosperity for all whilst engaging the common sense and human-scale values of real ecology to protect our only home, the Earth.*

This Universal Declaration is for every sovereign human being on Earth, regardless of race, creed, colour and received social standing.

Humanity is the condition of being human. Being a living, breathing human being with a soul is to have the capacity to feel and show compassion and kindness and the ability to practise wisdom. Thus, all of humanity is joined as one through the mutual experience of sharing these lasting values and virtues.

Planet Earth is also a living entity, along with all her sentient offspring. She shares a form of consciousness whose origins are Divine and which reaches its most self-aware form in the human being. In other words, in all of us.

We humans are gifted with this innate awareness from birth; and this awareness makes us recognise our common responsibility to be stewards and to support and nurture life in all its forms here on Earth and beyond.
